

# Ceramic Solutions for General Dentists

## Cutting

Rocky

**"I cut off 8 porcelain fused to zirconia veneers with only two Rocky burs!"**

– Dr. Rob DiVito

- Powers through multiple zirconia crown removals
- Decrease chair time, hand fatigue, and trauma

## Adjusting

ZR Diamonds

**"Efficiently cuts through zirconia but also handles softer porcelain with ease."**

– Dr. Bradley Ross

- Reduce material rapidly with little effort
- Extremely durable diamonds that are densely packed and permanently bonded

Available in coarse (green) and fine (red) grits

## Polishing

ZR Flash Polishers™

- Efficiently provide a smooth, glossy finish with a longer service life due to being interspersed with diamonds
- Save time with 2-step polishing system instead of 3

Pre-polish using a coarse (blue) polisher followed by a fine (gray) polisher for a high-shine finish

# Removing Zirconia Shouldn't Slow You Down

If its taking too long, causing too much strain or slowing you down, it's time to speed up with Rocky and Synea Power Edition.

## No lost momentum.

Rocky's cutting edges are 74% sharper and stay sharp through multiple crown removals

## No more bogging down mid-procedure.

Synea Power Edition offers 20% more clamping force

## Decrease chair time.

Rocky cuts ceramic materials 87% faster than other crown cutters

## Less handpiece repairs needed.

Synea Power Edition was created to complement high-performance zirconia cutters.
